Benefits of Honda Automotive Technology

Students receive training through a combination of classroom theory, hands-on lab work, general education components, and an internship with a local dealership.

The Certificate in Honda Automotive Technology is complimentary to the Honda Automotive Technology Associate Degree at NCC. Students who wish to complete the Associate Degree can start their second year as a degree student.

Career opportunities are available in positions for automotive service technicians in Honda/Acura dealerships, independent shops and automotive machine shops. In addition, graduates are also employed as service managers, shop foremen, parts managers, sales representatives or automotive instructors.

Graduates with practical experience, education, willingness to work and a high degree of professionalism may expect to find jobs in middle management or research occupations within major automotive corporations.

Register

Register for all of the courses recommended each semester. Take at least 14-16 credits each semester to graduate in two years. A higher percentage of students graduate when they complete 30+ credits within their first year. (Research by Complete College of America)
