INSTRUCTOR TRAINING FORM

ALL instructors are required to attend a minimum of 20 hours of recognized automotive industry technical update training each year that is relevant to their program. Please list all relevant industry update training for the past year below. Note: educational courses to fulfill state teacher licensure requirements, professional improvement and/or in-service activities do not count as industry technical update training. Use a separate form for each 12-month period (calendar year or academic year).

Hands-on Work Option: Under specific conditions, automotive instructors may substitute ten (10) hours of documented hands-on work for one (1) hour of update training. See the Hands-on Work Report on the next page for full details and requirements.

HANDS-ON WORK REPORT FORM

Automotive instructors may substitute ten (10) hours of documented hands-on work as a technician in a retail or fleet automotive repair business outside the school (e.g., part-time work or summer externship) for one (1) hour of automotive industry update technical training, up to a maximum of ten (10) hours of update technical training each year, toward the annual update training requirement. The work must be related to the areas they teach and take place in the same year for which substitute credit is sought. The ASE Education Foundation reserves the right to verify all hands-on work information reported and determine whether it meets all requirements.

If you wish to use hands-on work as a partial substitute for update technical training, complete the form below and have it signed by the business owner or manager. Use a separate form for each 12-month period (calendar year or academic year).
